

Project Initialization and Planning Phase

Date	27 June 2025
Student ID	SWUID20250181505
Project Name	online payments fraud detection using machine learning
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the user about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problems or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	but it takes a long time	because The website is not responsive and doesn't have a mobile version	which makes me feel Frustrated
--------------------	---	-----------------------------	--	-----------------------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am a small business owner	I'm trying to ensure that all	But I frequently	Because I lack access to an	Which makes me feel anxious about financial losses and

	processing online payments through a digital platform.	transactions are secure and legitimate to protect my revenue and customer trust.	encounter suspicious transactions that are difficult to identify as fraudulent in real-time.	automated, reliable tool to detect fraud instantly, relying instead on manual reviews that are time-consuming and error-prone.	frustrated by the inability to provide seamless, secure transactions for my customers.
PS-2	I am a financial institution manager responsible for overseeing online payment systems.	I'm trying to minimize fraudulent transactions to reduce financial losses and comply with regulatory requirements.	But the high volume of transactions and the rarity of fraudulent cases make it challenging to detect fraud accurately without flagging legitimate transactions.	Because current fraud detection systems are either too slow or generate too many false positives, disrupting customer experiences and increasing operational costs.	Which makes me feel overwhelmed by the risk of undetected fraud and pressured to balance security with customer satisfaction.
